

WILD ROSE 2 WIND FARM

Notice of Construction / October 2024

T7 Foundation Concrete Pour // Alberta

Construction Has Begun at the Wild Rose 2 Wind Farm

Capstone Infrastructure Corporation (Capstone) is pleased to announce that construction has begun on the Wild Rose 2 Wind Farm (the Project).

Borea Construction is the Project's contractor. Borea has constructed more than 7,500 MW of wind power across Canada, including three of the largest projects in the country. They consistently deliver on project schedules and ensure the highest levels of safety and quality.

Capstone has on-site staff that is available to respond to any inquiries or concerns from the public during the project construction. Please do not hesitate to reach out at your convenience:

Joe Costache
Construction Manager
Capstone Infrastructure Corporation
Tel: 403-968-8104
Email: projects@capstoneinfra.com

Project Updates

Construction Hours

Construction activities will generally be conducted between the hours of 7 a.m.-7 p.m., 7 days a week.

However, specific activities may take place outside of this window. For example, activities that are affected by inclement weather, high winds, or installation of a major component that must be completed to ensure the health and safety of site workers.

Lighting will be used for early morning concrete pours, limited to the area of construction and will not obstruct activities outside of the area.

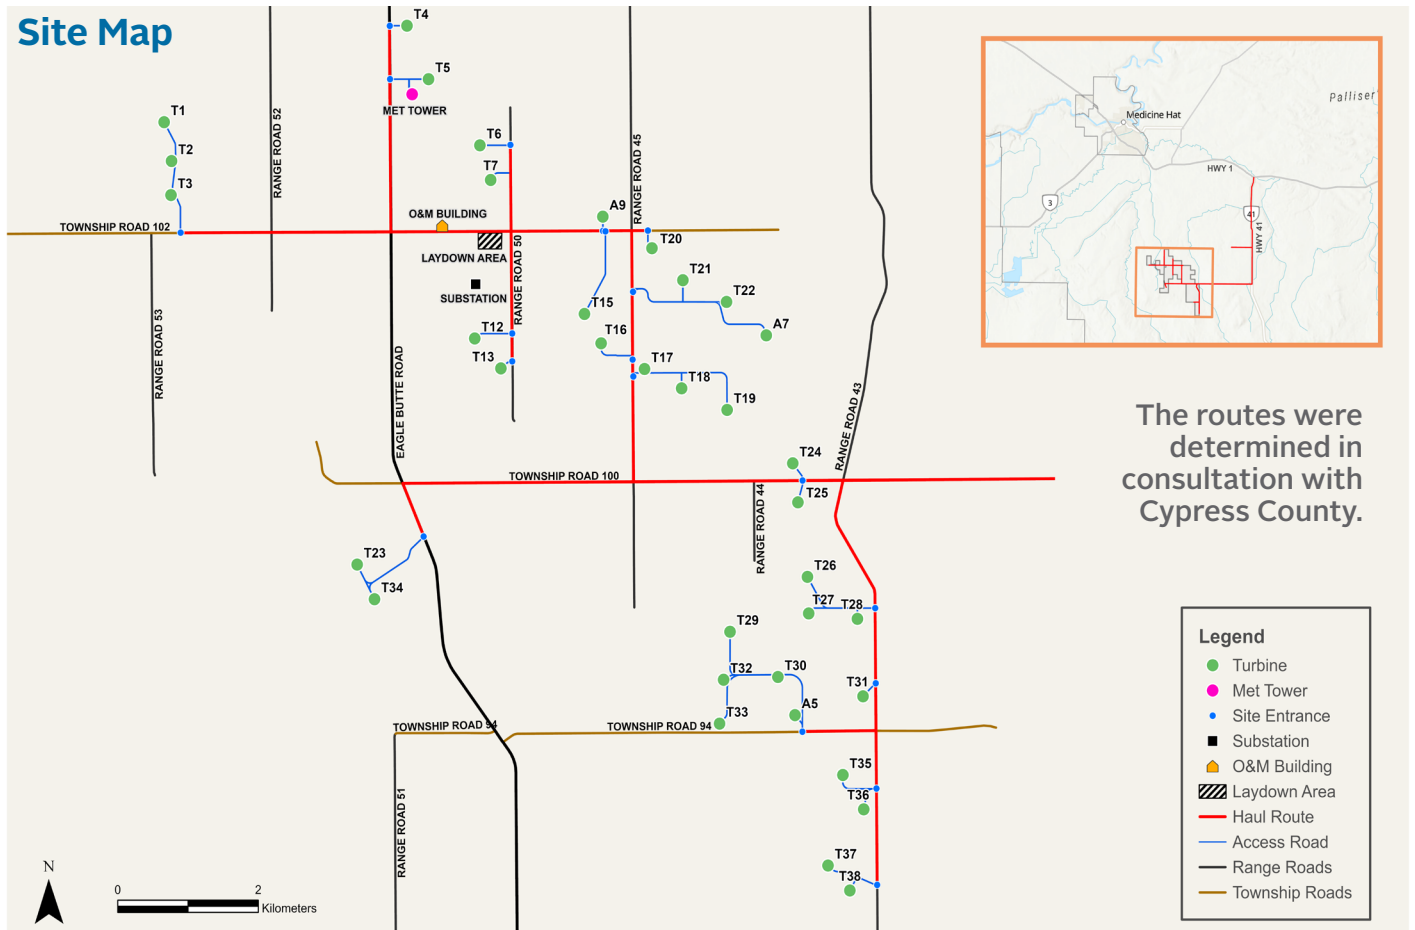

Construction Traffic Management

During construction, traffic volume on local roads will increase in peak periods due to equipment and material deliveries to site. A site-specific management plan has been developed to mitigate potential hazards and coordinate road use.

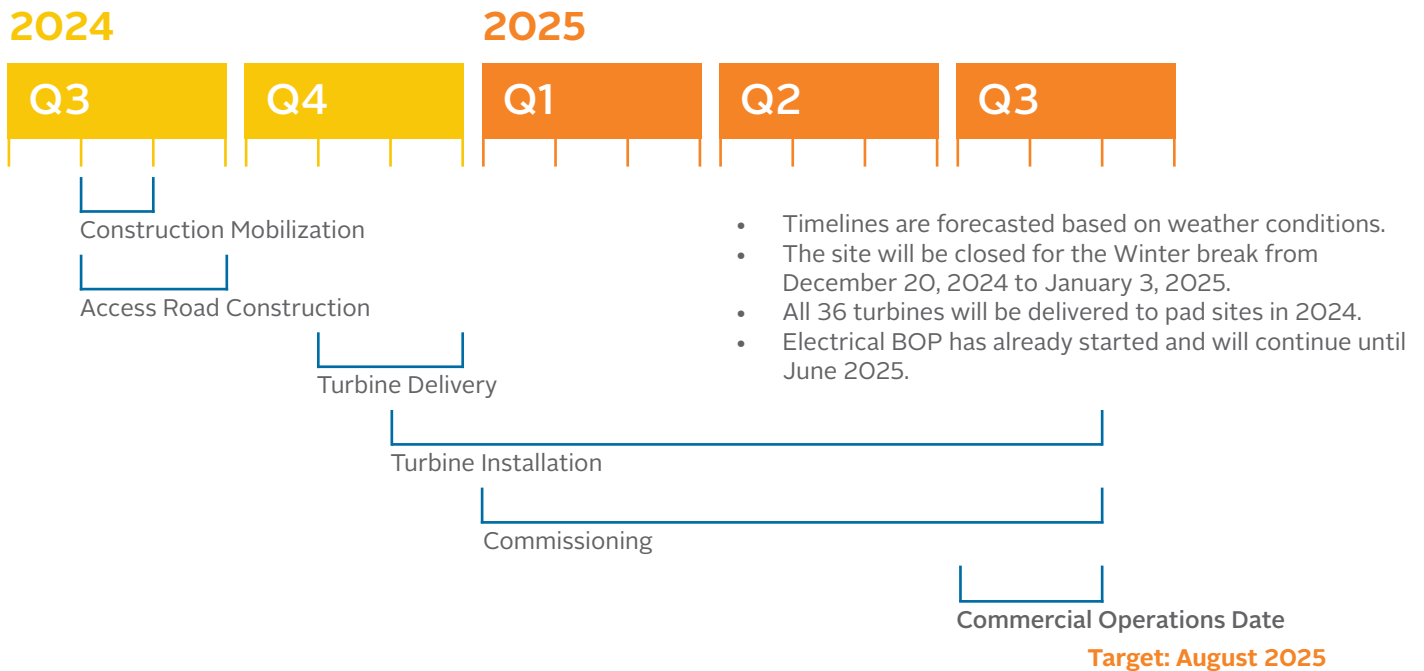

Traffic control will be managed by Borea Construction, including the use of construction signage, reduced driving speeds for construction traffic, and dust suppression.

Capstone has zero-tolerance for speeding or distracted driving, and kindly asks that any concerns be directed to the Capstone Construction Manager.
